Create Node-RED Service

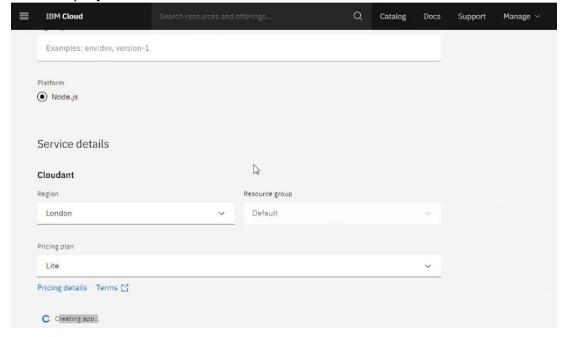

1.To create a web application create a Node-RED service.

Steps:

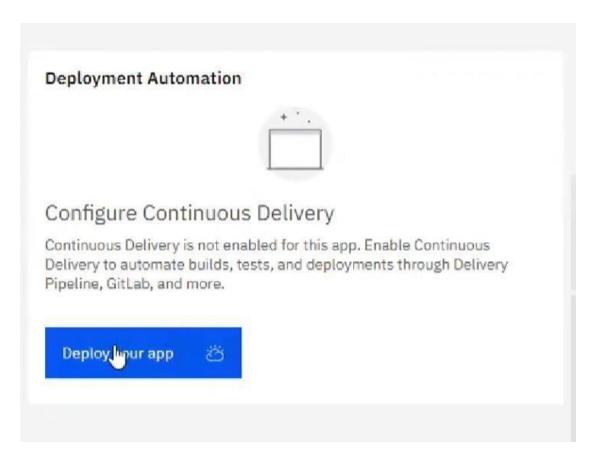

1. Navigated to the App creation page

2. Enter project details and click on create

3. Click on the "Deploy your App" Button

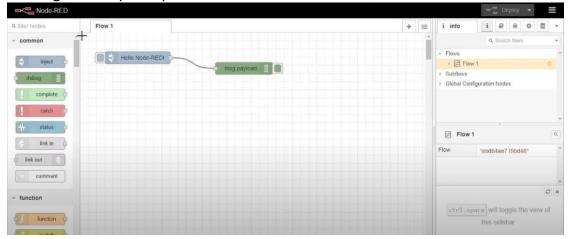

4. Set up the environment and deploy the app IBM Cloud Catalog Number of instances Memory allocation per instance 256 64 MB -2000 MB 1 0 **Delivery Pipelines** ci-pipeline [2] Name Success Status Last commit by IBM Cloud DevOps Last input Services (7 minutes ago) Clone from zip [2]

5. Instance editor and set up credentials

- Secure your editor so only authorised users can access it
 Not recommended: Allow anyone to access the editor and make changes
 Your editor will not be secured. Anyone with the URL will be able to access your flows, data and bound services.
 ☑ Tick this box to confirm you want your editor to be insecure
- 6. Drag and drop components into the editor

7. deployed the app

CONCLUSION:

Created a Node RED service on IBM Cloud Successfully
